

- P-01 **Crystallographic approaches to enhance kinetics of  $\text{Li}_3\text{VO}_4$  as a pseudocapacitive negative electrode**  
Keisuke Matsumura, Kenta Takagi, Etsuro Iwama, Wako Naoi, Yuki Orikasa, Patrick Rozier, Patrice Simon, Katsuhiko Naoi  
 (Tokyo University of Agriculture & Technology, K & W Inc., Ritsumeikan University, Université de Toulouse, Réseau sur le Stockage Electrochimique de l'Energie)
- P-02 **Applied Potential-Dependent Performance for the Nickel Cobalt Oxysulfide Nanotube/Nickel Molybdenum Oxide Nanosheet Core-Shell Structure on Energy Storage and Oxygen Evolution**  
Lu-Yin Lin, Kuan-Lin Chiu  
 (National Taipei University of Technology)
- P-03 **Synergetic effect of  $\text{RuO}_2$  addition to particulate  $\text{MnO}_2$ - $\text{RuO}_2$  nanosheet composite**  
Ryota Saito, Yusuke Sato, Daisuke Takimoto, Sho Hideshima, Wataru Sugimoto  
 (Shinshu University)
- P-04 **Vertically-aligned  $\text{Ti}_3\text{C}_2$  nanosheet electrode for high-performance electrochemical capacitor**  
Sho Hideshima, Yusuke Kawasaki, Daisuke Takimoto, Yury Gogotsi, Wataru Sugimoto  
 (Shinshu University, Drexel University)
- P-05 **High rate charge storage properties of  $\text{TiO}_2(\text{B})$ / vertically aligned graphene electrodes with different  $\text{TiO}_2(\text{B})$  nanosheet size**  
Itsuki Nagatani, Daisuke Takimoto, Sho Hideshima, Wataru Sugimoto  
 (Shinshu University)
- P-06 **Synthesis and Characterization of Nitrogen Doped Graphene Nanowalls by Plasma Enhanced Chemical Vapor Deposition Using Different Carbon Sources for High Voltage Supercapacitors**  
Da-Je Hsu, Jui-Yu Pai, Yu-Wen Chi, Kun-Ping Huang, Chi-Chang Hu  
 (National Tsing Hua University, Industrial Technology Research Institute, )
- P-07 **Single Wall Carbon Nanotube Electrodes of Different Morphologies**  
 Yuito Kamijyou, Radovan Kukobat, Koki Urita, Yoshiyuki Hattori, Ryusuke Futamura, Isamu Moriguchi, Toshio Sakai, Katsumi Kaneko  
 (Shinshu University, Nagasaki University, )
- P-08 **Nitrogen-doped seamless activated carbon electrode with excellent durability against high voltage for EDLC**  
Tomomi Tagaya, Yoshikiyo Hatakeyama, Soshi Shiraishi, Hidehiko Tsukada, María José Mostazo-López, Emilia Morallón, Diego Cazorla-Amorós  
 (Gunma University, Universidad de Alicante)
- P-09 **Carbons from Mesophase Pitch for High Performance Electric Double Layer Capacitors**  
 Pin-I Wu, Yan-Shi Chen, Goa-Shee Leu, Yu-Tung Hsu, Yu-Cheng Tseng, Ramesh Subramani, Hsisheng Teng  
 (National Cheng Kung University, CPC Corporation)
- P-10 **Pillared graphene materials for electrochemical capacitors**  
 Harish Banda, S. Périé, Barbara Daffos, Pierre - Louis Taberna, Lionel Dubois, Olivier Crosnier  
 (Univ. Grenoble Alpes, Université de Toulouse, Réseau sur le Stockage Electrochimique de l'Energie, University of Nantes)

- P-11 **Pore structure analysis of seamless activated carbon electrode using small-angle X-ray scattering**  
Yoshikiyo Hatakeyama, Ken Hanazato, Soshi Shiraishi, Hidehiko Tsukada  
(Gunma University, AION)
- P-12 **Simple pore accessibility estimation method of Electric double-layer capacitors (EDLC) electrode**  
Jonghak Lee, Ong Yong Kang, Cagdas Cetin, Clarissa Wong Chui Ling, Barbaros Özyilmaz  
(National University of Singapore)
- P-13 **Superionic States Formation of Ionic Liquids in 1 Dimensional Nanopores of Carbon Nanotubes**  
Ryusuke Futamura, Taku Iiyama, Yury Gogotsi, Mark J. Biggs, Mathieu Salanne, Patrice Simon, Katsumi Kaneko  
(Shinshu University, Drexel University, Loughborough University, The University of Adelaide, Sorbonne Universités, Université Paul Sabatier)
- P-14 **Modified Amorphous Carbon for Symmetric High-Voltage Supercapacitors in Organic Solution**  
Chih-Yu Ku, Yu-Chen Liu, Tien-Yu Yi, Chi-Chang Hu  
(National Tsing Hua University)
- P-15 **Electrochemical Properties of Graphite-Oxide Lithium Capacitor**  
Izuru Shimabukuro, Yoshikiyo Hatakeyama, Soshi Shiraishi  
(Gunma University)
- P-16 **Improvement and stabilization of discharge characteristics of lithium storage carbon electrode by addition of trace metal ion**  
Wei Shengkang, Akinori Muto  
(Osaka Prefecture University)
- P-17 **Expansion of operating potential of activated carbon negative electrode by electrolyte design and its application to hybrid capacitor**  
Ami Nakamura, Masashi Ishikawa  
(Kansai University)
- P-18 **Dual-Cation Electrolytes for Low Gas Generation of  $\text{Li}_4\text{Ti}_5\text{O}_{12}$ //AC Hybrid Capacitor system**  
Yu Chikaoka, Yuta Okuno, Tsukasa Ueda, Etsuro Iwama, Wako Naoi, Katsuhiko Naoi  
(Tokyo University of Agriculture & Technology, K & W Inc.)
- P-19 **Synthesis of Si-O-C composite and its electrochemical performance as a high-rate performance anode for Lithium-ion capacitor**  
Seongki Ahn, Toshiyuki Momma, Wataru Sugimoto, Tetsuya Osaka  
(Waseda University, Shinshu University)
- P-20 **The Influence of FEC Additive to The Graphite Anodes for Lithium Ion Capacitor**  
Minori Fukushima, Toshiyuki Momma, Wataru Sugimoto, Hiroki Nara, Tetsuya Osaka  
(Waseda University, Shinshu University)
- P-21 **Electrochemical properties of flexible supercapacitors based on Korean paper 'Hanji' electrodes**  
Hyemin Kwon, Sanggyu Lim  
(Kookmin University)

- P-22 **All-metal-oxide-nanoparticles-based electrodes for high energy density asymmetric supercapacitors**  
Sohyun Jin, Sanggyu Yim  
(Kookmin University)
- P-23 **Rice husk-based Cathode and Anode Active Materials of Lithium-ion Capacitor**  
Seiji Kumagai, Yusuke Abe, Tomoaki Saito, Hiroaki Fujiwara, Naoki Sawa, Takuya Eguchi, Masahiro Tomioka, Mahmudul Kabir, and Daisuke Tashima  
(Akita University, Fukuoka Institute of Technology)
- P-24 **Influence of Graphitic Structure of the Anode on the Performance Lithium Ion Capacitors**  
Yu-Cheng Chen, Yu Cheng Tseng, Hsisheng Teng  
(National Cheng Kung University)
- P-25 **High performance asymmetric supercapacitor:  $\text{Na}_x\text{MnO}_2$ @CNT /WPU-PAAK/AC-CNT**  
Jeng-An Wang, Li-Qian Wang, Chih-Han Yen and Chi-Chang Hu  
(National Tsing Hua University)
